

DEGAROUTE® Structure Markings for superior wet-night visibility

DEGAROUTE® based structure markings Key Advantages

DEGAROUTE® based structure markings are a cost-effective and environmentally friendly way of applying safe MMA cold plastic road markings.

Outstanding durability:

- Proven long-term service life and performance
- High wear resistance – easily withstands high traffic load and snowplowing
- Vertical surfaces improve retained retroreflectivity
- Excellent adhesion to concrete and asphalt surfaces

Excellent Wet Night Visibility:

- 3D structure allows for excellent water drainage
- Structure depth increases visibility during rain
- Improved delineation in inclement weather conditions

Cost-effective system:

- Long service life
- Excellent interlayer bonding – easy maintenance
- Easy refresh with a DEGAROUTE® spray application

Environmentally Friendly:

- Proven through life cycle assessment (LCA) to have a low environmental impact when compared to other systems
- No solvent emissions

Equipment available in North America!

Evonik has developed program to aid our equipment manufacturers in the mobilization of MMA cold plastic equipment across the country. This program includes:

- Equipment specifically designed to apply DEGAROUTE® based structured marking formulations at the exact mixing ratio and pattern
- Dedicated on-site technical training and support for application units and projects
- Consulting to determine the best equipment for any given project
- Financing and leasing options available for new and existing equipment
