

DEGAROUTE® Project Profile – *Parking Area*

General Information:

Location: Horgen, Switzerland
Project Owner: City of Horgen
Applicator: Morf AG
Application Date: 2009

Project Background and Objective:

The railway street of the city of Horgen became a colored and pleasant meeting zone which, above all, invites drivers to reduce speed and watch out for pedestrians. Antiskid area markings in a 6,000m² area were harmonically laid in 5 different colors. By being creative and contributing to safety, the project gained the attention of several newspapers and magazines in Switzerland.

RTU System:

Area marking system with antiskid properties produced by Basler Lacke AG.
