

# DEGAROUTE®

## Project Profile – *Safety Meets Design*

### General Information:

Location: Jakomini District, Graz, Austria  
Project Owner: City of Graz  
Application Date: April/May 2011

### Project Background and Objective:

About 17 metric tons of the skid-proof and environmentally safe red area marking, was laid over an area of 4,611 square meters. The “Rote Laufbahn” is a part of the urban development concept of Graz. The aim of the city was to make the Jakomini district more attractive for residents and tourists and to settle craftspeople and artists there, under an urban development scheme.

### RTU System:

Area marking system with antiskid properties produced by Limburger Lackfabrik and Stollreflex.
